

## Simple, Powerful Collaboration

We have partnered with Box to provide you with a powerful, yet easy to use content management and collaboration platform.

### Box enables you to:

- ❖ Share large Files with anyone
- ❖ Access your files anywhere even from a mobile device
- ❖ Edit and preview documents online
- ❖ Maximize productivity with notifications and version tracking
- ❖ Promote collaboration internally and externally

### Five of our favorite features:

1. Online Workspaces - Create shared workspaces and easily invite team members to upload files, start discussions and collaborate online

2. File Sharing - Easily share large files both within your company and with external partners replacing FTP software and email attachments. You can even see when your files are downloaded! Replace your file server with an online company-wide file system.

3. File Commenting, Group Discussions and Online Documents - Leave comments attached to a specific document, start a group discussion, or create and share a simple document.

4. Version History - View previous versions of your files even after changes are made and new versions are uploaded. \*Business only

5. Easy-to-Use - Minimize user training and support costs, eliminate software or hardware maintenance, and get started in just minutes.

Manage, Share & Collaborate on all of your company's important files.
